Eligibility & calculation rules required.

Recommended: document eligibility, caps, payment timing, reversals, taxes and audit procedures for every incentive.

4. Withdrawal Policy & Operating Model

Weekly settlement policy plus a controlled customer-to-settlement workflow

5. Governance, Roadmap, KPIs & Risk

Smart finishing: focus on verification, controls and sustainable operations

LAUNCH ROADMAP

- Confirm legal entity, structure and applicable permissions
- Build accounting, reconciliation and payout controls
- Implement secure customer portal and incentive ledger
- Validate product economics and trading risk controls
- Run controlled pilot and test support/settlement
- Launch with ongoing compliance and independent review

CORE KPIs

Verified customers • retention • support resolution
Cash reserve • reconciliation variance • operating margin
Trading drawdown • product margin • payout accuracy

KEY RISKS

Regulatory • market • liquidity • counterparty
Fraud/AML • cybersecurity • consumer protection • marketing
accuracy

External-use reminder

Verify company claims, partnerships, licensing, financial
assumptions and return-related representations.

RICH BYTE

Business Plan

Structured participation • Incentives • Governance • Risk controls

A professional business plan should separate illustrative model figures from verified business performance.
